## CALIFORNIA PROPOSITON 65 COMPLIANCE

To our valued customers:

It is the intention of Lapham-Hickey Steel to be in compliance with the requirements of California Proposition 65, latest revision.

To this end, we require our steel producing mills to provide a chemical list on their certification for comparison to the Prop 65 listing of concerned chemicals. LHS verifies the chemicals are compliant to the *safe harbor* levels for our customer who have "Proposition 65 Compliance" listed within their requirements.

If a product is processed by LHS that does not meet the regulations, then a warning label shall be affixed to our coil tags noting chemicals that may not be in compliance with safe harbor levels. This is done to satisfy the requirements for the regulation.

Sincerely,

Rick Hinton  
Corporate Quality Director
